

Integrated Operations' Viral Defense <sup>TM</sup>

SOLUTIONS FOR BUSINESS & INDUSTRY

SECURITY & DISINFECTION

## CREATING HEALTHIER ENVIRONMENTS

Businesses worldwide are facing increasing pressure to:

- Provide safer, more germ-free environments for employees and visitors to mitigate the spread of germs.
- Maintain or reduce cost levels to disinfect properly.

Integrated Operations offers state of the art detection, security and disinfection equipment through its Viral Defense brand. Utilizing breakthrough technologies, we provide the most innovative solutions to support cleaner and healthier environments, lower the cost of disinfection for businesses and reduce the concerns of employees and visitors when entering buildings.

With the advent of the COVID-19 pandemic, Integrated Operations has been working with colleagues around the globe to bring technologies that promote safety and security, help mitigate the spread of the virus, and provide safer, cleaner, less germ-ridden environments in general.

We offer:

- Optimized Safety and Security of venues
- Improved comfort and peace of mind for management and staff based on accurate detection of potential contagion and state of the art security measures to prevent entry by unauthorized personnel
- Optimized disinfection of offices, lobby and common areas to mitigate the spread of harmful bacteria and viruses

## DETECTION & SECURITY

- Automated temperature/fever detection for up to five people at a time: Ability to select potentially infected employees and visitors from within a crowd.
- Automated mask wearing detection: Ability to select staff, students and visitors not wearing masks from within a crowd.
- Comprehensive facial recognition/detection and other biometric security options: These systems feature the same advanced technologies that are used by law enforcement and airport security in a variety of locations around the world.
- Rapid Test Kits: Available to those who may have elevated temperatures: To help ensure that they are not infected with SARS-CoV-2 Virus
