

Integrated Operations' Viral Defense TM

SOLUTIONS FOR THE HOSPITALITY INDUSTRY SECURITY & DISINFECTION

CREATING HEALTHIER ENVIRONMENTS

The Hospitality Industry worldwide is facing increasing pressure to:

- Provide safer, germ-free environments for staff and guests to mitigate the spread of germs
- Maintain or reduce cost levels to disinfect properly

Integrated Operations offers state of the art detection, security and disinfection equipment through its Viral Defense brand. Utilizing breakthrough technologies, we provide the most innovative solutions to support cleaner and healthier environments, to lower the cost of disinfection throughout the facility and to reduce concerns by staff and guests when entering one or your properties.

With the advent of the COVID-19 pandemic, Integrated Operations has been working with colleagues around the globe to bring technologies that promote safety and security, help mitigate the spread of the virus and provide safer, cleaner, less germ-ridden environments in general.

Among the areas we focus on are:

- Optimized Safety and Security of facilities
- Improved comfort of staff and guests based on steps taken to ensure safe environments through accurate detection of potential contagion and overall security
- Optimized disinfection of properties to mitigate the spread of harmful viruses and bacteria
